

# Can You Save A Life?

## Free AED's for you.

With the cost of life saving technology out of reach for most people and organisations, Tactical would like to help you obtain the technology that can literally mean the difference between life and death.

Just by simply meeting your training obligations, your organisation can have a supplied, maintained, and serviced Automated External Defibrillator (AED) without the outlay or headaches. Many organisations so far have qualified for several AED's.

All we ask is that you train with us and maintain that training over the program life.

## How does the program work?

The program is simple. Based on the amount of training your organisation requires, Tactical will supply and maintain your AED at no cost. Consider it our gift (on loan) to you.

The AED remains the property of Tactical and at the end of each program cycle in the program we will replace your unit with a new one and the program starts again.

- No cost
- No lock in contracts

While you train with us and maintain your eligibility level, you keep the AED and any equipment.

## No hidden costs or catch.

It is an offer that leaves most people thinking "what is the catch?" Well, there are none. We are not going to ask you for more money down the line nor are there extra things you need to pay for. People have tried to find the loop hole and failed, because there is none.

Simply train with us and we will provide you with the number of AED's you qualify for.

Give us a call and you will see that with this offer, you win.

## Helping the community.

Would it be comforting to know that AED's are finding their way in to our community and that you and your family have this life saving technology available when it is needed?

At the end of your training cycle we will donate your replaced AED (with 2 years warranty remaining) to a community or charity organisation who has registered with us. It is theirs to keep and do as they please with. It might be the under 14's footy club, a volunteer group, someone who can least afford it will get the benefit free of charge thanks to yourself and Tactical.

## About Us

Tactical Training (Australia) Pty Ltd is one of South Australia's leading Registered Training Organisations. With over 25 years of dedicated and specialist training services both domestic and international we have always strived to offer more than training, we offer solutions.

Based on both practical and real world experience, underpinned by extensive tertiary education in relevant disciplines, Tactical Training is confident we can not only meet your expectation but dramatically exceed them.

Give us a call and let us worry about your training obligations and absorb all that stress (that's what we specialize in) so you can get on with what you do best... running your business.

## About the Program

By training with Tactical Training (Australia) Pty Ltd you accrue credits. This training can be from a selection of training courses per year but First Aid is a mandatory course requirement for each organisation. The credits accrue quickly and when each milestone is reached a new AED is supplied and maintained. The initial AED is issued after only each block of 4 training sessions in the first year. After that the minimum to maintain eligibility is two sessions each year on the cycle except in the 4th year with a total of 4 required. The cycle of the AED program is six years but no obligation to stay in the program. If you leave the program, we simply collect our AED and equipment from your premises and no further commitment is required.

To find out if you qualify, call us on the details below for a free, no obligation assessment
